Re: Field Visit to American Stone Quarry, ACT/003/002

On October 23, 1986 Dave Wham and I made an attempt to visit the American Stone Quarry. The area is fenced for cattle and all the road gates were locked. The quarry site on the west slope of the mountain is visible and does not appear to be very large. A larger quarry, DOE/003/001, is located further to the west.
